Dyslexia screening test

Move through age selection, difficulty selection, and three reading tasks. Each section supports audio capture in the UI and is ready for later backend integration.

Select age group

Choose the learner's age range to load the appropriate screening content.

AGE GROUP

6-8

AGE GROUP

9-12

AGE GROUP

13-15

Select difficulty

Pick the reading difficulty level for this screening session.

DIFFICULTY

Easy

Short, more familiar reading items for a gentle start.

DIFFICULTY

Moderate

Balanced reading content with slightly longer vocabulary and sentences.

DIFFICULTY

Hard

More advanced vocabulary, sentence structure, and paragraph complexity.

Dyslexia screening test

Move through age selection, difficulty selection, and three reading tasks. Each section supports audio capture in the UI and is ready for later backend integration.

Select Tests

Choose one or more tests to include in your screening session.

Reading Test

Read words, sentences, and paragraphs aloud

Spelling Test

Spell words and phrases correctly

Phonological Test

Identify and manipulate sounds in words

Word Recognition Test

Recognize and differentiate similar words

Syllable Test

Count and segment syllables in words

Overall Score

65%

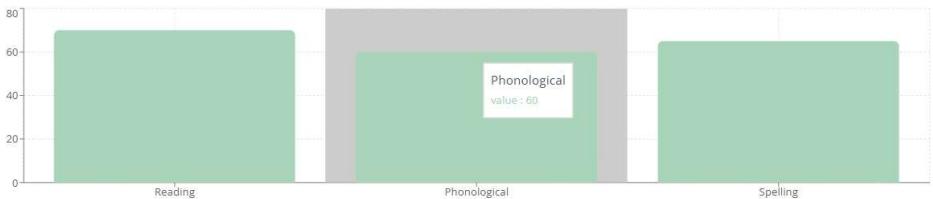

What This Means

Your screening suggests moderate dyslexia characteristics. Consider professional evaluation.

AI Assessment Summary

Your results indicate some characteristics associated with dyslexia. We recommend a comprehensive evaluation by a qualified dyslexia specialist or educational psychologist. Early intervention can significantly improve reading outcomes.
